

ArtecAMBIENTE srl is a private company active in the field of wastewater treatment, rainwater harvesting and reuse and solar energy systems.

We operate in designing and building of water treatment plants with **CONSTRUCTED WETLAND SYSTEMS**.

We have open projects in Italy, Slovak Republic, Algeria, Rodi, Paraguay, India and Capo Verde. We collaborate with an international team of treatment wetlands implementation for the design of big systems in Australia, Maldives, Central and South America.

We are searching private and institutional partners for developing sustainable project on water treatment with constructed wetland in rural areas and development countries.

The "Artec AMBIENTE srl" objective is to produce a sustainable lifestyle, respectful of the human processes and aware of fitting these concepts in a more ample context.

The purpose is the environmental process concerning the planet Earth and all its components: humanity, animals, minerals, lands and waters, atmosphere and energies.
